

Module 06 – Transshipment Problem

EDA

Graph of data:

Model Formulation

Decision Variables: the amount of goods shipped from node i to node j (0,1,2,3,4,5,6,7,8)

Objective Function: Minimize transportation Cost (the amount shipped X unit costs)

$$\min Z = 34x_{07} + 26x_{13} + 24x_{13} + 37x_{37} + 35x_{14} + 41x_{24} + 47x_{26} + 46x_{48} + 35x_{47} + 27x_{63} + 41x_{74} + 26x_{78} + 34x_{73} + 39x_{85} + 34x_{87}$$

Constraints: Supply (each supply node can only ship up to available supply) and Demand (each demand node must satisfy demand)

$$x_{07} \leq 300$$

$$x_{13} + x_{16} + x_{14} \leq 342$$

$$x_{24} + x_{26} \leq 256$$

$$x_{13} + x_{63} + x_{73} = 123$$

$$x_{14} + x_{24} + x_{74} = 184$$

$$x_{85} = 76$$

$$x_{16} + x_{26} = 215$$

$$x_{07} + x_{37} + x_{47} + x_{87} = 200$$

$$x_{48} + x_{78} = 202$$

Nodes	Inflow	Outflow	Net Flow	Supply/Demand
0 Butter Pecan Bluff	0	300	-300	-300
1 Fruity Gusher Geyser	0	342	-342	-342
2 Ginger Snap Garden	0	256	-256	-256
3 Jelly River Delta	123	0	123	123
4 Pineapple Pop Paradise	360	176	184	184
5 Praline Park	0	0	0	76
6 Soda Pop Springs	215	0	215	215
7 Starburst Starlit Skies	300	100	200	200
8 Toblerone Tower	176	0	176	202

Model Optimized for Minimal Transportation Cost

				Transportation Cost->	\$ 43,898.00

This model suggests that following the transportation plan (amount shipped from one node to another) will achieve a total minimal transportation cost of \$43,898

Model with Stipulation

Balance of Flow constraint ensures that for transshipment nodes, the total goods coming into the node equal the total goods going out. This is necessary because it guarantees that no excess or deficit is left at the transshipment node.

When you change the model to make the total supply greater than demand by adding 155 units to a source, solver cannot find a feasible solution. For the model to work again, constraints need to be changed as demand is greater than supply after adding 115 units. When you make the demand greater than supply, the transportation cost increases.

			Transportation Cost->		\$ 47,044.00
